

# Metal HVAC Filter Frame

**Purpose:**

Reusable metal HVAC filter frames replace traditional disposable cardboard filters with a durable, cost efficient and sustainable alternative. Designed to last the life of the HVAC system, foam filter pads can be quickly and easily replaced during routine service saving money and time. HVAC Filter frames are manufactured in the USA ensuring high quality and availability.

**Assembly:**

RGF HVAC Filter Frames are constructed from aluminum for durability and corrosion protection. The frame's enclosed aluminum grill is located on the supply air side offering easy filter replacement. Additional sizes are available on order with minimum order quantities.
