

# Metal HVAC Drain Pan

## Purpose:

Efficiently collect and channel condensate water away from HVAC systems, preventing damage to surrounding structures and ensuring optimal performance and longevity of the HVAC unit. Constructed with durable galvanized steel and manufactured in the USA, our drain pan provides reliable corrosion resistance and structural integrity, offering peace of mind to homeowners and HVAC professionals alike.

## Assembly:

RGF's Drain Pans are constructed from 26 gauge galvanized steel for durability and corrosion protection. Seamless, one-piece construction with hemmed edges for maximum safety and drain outlet (PVC fitting provided).

## Material:

Galvanized Steel

Part #	Description	Dimensions in Inches			UPC
		A	B	C
