WE ARE RGF®

The REME-MS™ LED UV Mini-split Air Purifier

REME-MS™ is an active air purification system engineered specifically for ductless mini-split HVAC systems. Powered by RGF's proprietary REME-LED® technology, REME-MS™ continuously treats the air throughout the conditioned space while simultaneously helping keep the interior of the mini-split air handler clean. The result is cleaner indoor air and a cleaner HVAC system.

Why Use RGF's REME-LED® Technology?

At the heart of REME-MS™ is RGF's patented REME-LED® active air purification technology. A high-intensity LED UV light is directed onto a hydrated catalyst, promoting the conversion of naturally occurring water vapor into molecules of airborne hydrogen peroxide (H₂O₂). These hydrogen peroxide molecules are continuously generated and carried throughout the conditioned space by the mini-split airflow, where they actively treat the air occupants breathe while also helping maintain cleaner interior HVAC surfaces.

A built-in cell change indicator light provides visual indication for when it's time to replace your REME-LED® Cell (required every 5-years).

REME-MS™ LED UV Mini-split Air Purifier

ITEM#	ELECTRICAL	AMPS	WATTS	DIMENSIONS
REME-MS	100-240 VAC, 50/60Hz	0.35	8.5	10"L x 1.75"W x 0.75"D 254mm x 44.5mm x 19.1mm

MATERIALS

Aluminum / Polymers

REPLACEMENT CELL

PHIC-REME-MS

CELL REPLACEMENT

5 years

WARRANTY

7-year Power Supply /
4-year LED Cell
