

WE ARE RGF®

The Rapid Recovery Unit® Air Purification and Odor Control System

RGF's Rapid Recovery Unit® (RRU) is the ideal decontamination solution to resolve microbial and odor issues of various types and can be used to rapidly and effectively treat many problem areas. Hotels, cruise ships, property management companies and HVAC contractors have taken a proactive approach in utilizing the RRU to disinfect and mitigate odors in areas of concern.

Why Use RGF's PHI-CELL® Technology?

Rapid Recovery Unit® (RRU) utilizes RGF's patented PHI-Cell® technology to generate airborne gaseous hydrogen peroxide (aGHP®). Low level hydrogen peroxide is distributed throughout the space to actively reduce microbes and odors in the air and on surfaces. The RRU features an internal fan to help distribute aGHP® throughout the treatment area and an odor absorbing media filter to help reduce odors.

The Rapid Recovery Unit® Air Purification and Odor Control System

ITEM#	REPLACEMENT CELL	ELECTRICAL	WATTS	DIMENSIONS	SHIP WT.
RRU-16	RRU-CELL-KIT	110 VAC	110	26"L x 13"W x 15"H 660.4mm x 330.2mm x 381mm	12 lbs.
(International) RRU-25	RRU-CELL-KIT	220 VAC	105		5.44 kg.

MATERIALS

Stainless steel

FAN VOLUME

88 CFM (149.51 m³/h)

CELL REPLACEMENT

Recommended after 2 years
Use part# RRU-CELL-KIT

WARRANTY

2 year U.S. and Canada
(1 year international)
